

# CircuitWorks<sup>®</sup> BA Empty Dispensing Pens

## PRODUCT DESCRIPTION

CircuitWorks<sup>®</sup> BA Empty Dispensing Pens are offered to provide flexibility in using liquids. This unique dispensing pen allows the user to fill the pens with any liquids required, whether fluxes, flux removers, solvents, lubricants or other liquids. The body of this pen is made from durable aluminum, making it more resistant to corrosion than tin-plate dispensers. It's large reservoir holds more material than most disposable pens, increasing use time between filling. The large stable base lets the user stand the pen on it's end, minimizing bench space used, and it's unique cap prevents the pen from rolling if laid on it's side.

- Fill with choice of liquid
- Holds up to 40 ml of liquid
- Completely portable package
- Wide mouth for easy filling
- Wide base for stand up durability
- Tough, durable body valve and nip
- Anti-roll cap to prevent rolling from bench

## TYPICAL APPLICATIONS

CircuitWorks<sup>®</sup> BA Empty Dispensing Pens can be used to dispense:

- Flux
- Flux Removers
- Cleaning solvents
- Lubricants
- Most Liquids

## COMPATIBILITY

CircuitWorks<sup>®</sup> BA Empty Dispensing Pens are generally compatible with most solutions used in the electronics industry. However, as the body is made of aluminum, materials that are incompatible with aluminum must be avoided. Material compatibility should be determined prior to use.

## USAGE INSTRUCTIONS

Turn cap and valve assembly counter-clockwise to open. Fill pen with liquid. Close tightly. Hold pen vertically and briefly depress tip to start liquid flow. Rub pen tip on surface to be fluxed. Wipe tip on a ControlWipe<sup>™</sup> dry wipe to remove buildup.

## AVAILABILITY

CW7000 2 empty pens, 2 extra nibs
